PROFILE INFO

Site Reliability Engineer with 4+ years of experience across production operations, cloud infrastructure, application support, and automation. Experienced in AWS, Terraform, GitHub Actions, Prometheus, Grafana, and Python, with a strong focus on improving system reliability, automating deployments, and building monitoring solutions. Proven ability to collaborate across development and DevOps teams to enhance platform stability, streamline operations, and deliver reliable, scalable infrastructure.

EXPERIENCE

■ Metrum Research Group (EOR – Justworks)

July 2025-Present

Site Reliability Engineer

- Proactively **monitor production infrastructure** and application health across networking, CPU, memory utilization, and service availability, enabling early detection of performance bottlenecks and minimizing service disruptions.
- Designed and implemented custom monitoring scripts integrated with **Prometheus** and **Grafana** dashboards, providing real-time visibility into critical services and significantly reducing manual troubleshooting effort and incident response time.
- Spearheaded the transition from manual **Terraform deployments** to automated **GitHub Actions CI/CD** pipelines by developing reusable **YAML** workflows, improving deployment consistency, reducing human error, and accelerating release cycles.
- Provision and manage **AWS** cloud infrastructure using **Terraform**, leveraging **Infrastructure as Code (IaC)** to deliver scalable, repeatable, and version-controlled resource management.
- Investigate production incidents and client-reported issues through **Jira**, performing root cause analysis and implementing preventive solutions that improve platform stability and reduce recurring incidents.
- Collaborate with **DevOps** and development teams to validate new features, conduct deployment **testing** across development and test environments, and ensure reliable production releases with minimal downtime.
- Develop and maintain operational runbooks and knowledge base articles that power **AI-assisted** support, improving the accuracy of automated troubleshooting and enabling faster issue resolution for end users.
- Continuously identify automation opportunities across **monitoring**, deployment, and operational workflows, improving engineering efficiency, reducing manual intervention, and increasing overall platform reliability.

Senior IT Analyst (Aug 2023 – July 2025)

IT Analyst (Jun 2022 – Jul 2023)

Project - Application Support for cisco

- Provided **L2/L3** technical support for Cisco enterprise applications across Windows, macOS, **Microsoft 365**, **Jamf**, **Azure**, Oracle, and Java environments.
- Managed incidents, service requests, and escalations using **ServiceNow**, including support for VIP users while maintaining SLA compliance.
- Monitored enterprise applications, proactively identifying outages, performance issues, and service disruptions.
- Administered **Jamf**, **Duo**, and **SharePoint**, managing user access, permissions, and endpoint security.
- Automated operational tasks and reporting using APIs and **Power Automate**, improving workflow efficiency.
- Served as a SharePoint **Subject Matter Expert (SME)**, providing technical guidance and resolving complex issues.
- Collaborated with cross-functional teams to troubleshoot infrastructure, application, and networking-related issues.

CGPA - 8.4 | 2013 |

CERTIFICATIONS AND RECOGNIZATION

- **MERN30: FULL STACK DEVELOPMENT** By Hash Research
- **Python Certifications** By Coursera - [Certificate Link](#)

RECOGNITIONS

- **Quality Champion Peformer** of the quarter 2024
- **T2 PC performer** of the quarter Q3 2024
- **Cisco Recognized Top performer** Q1 2025

SKILLS

- Cloud Platforms: AWS, Microsoft Azure
- Infrastructure as Code: Terraform
- CI/CD & Version Control: Git, GitHub, GitHub Actions
- Containers: Docker
- Monitoring & Observability: Grafana, Prometheus
- Operating Systems: Linux, Windows, macOS
- Programming & Scripting: Python, PowerShell, Bash, Power Automate, YAML
- Enterprise Tools: Jira, ServiceNow, SharePoint, Jamf Pro, Duo Security
- Cloud & Productivity: Microsoft 365 (Office 365)
- Databases & Technologies: SQL, Java
- Networking: TCP/IP, DNS, DHCP, VPN, HTTP/HTTPS, SSL/TLS, Network Troubleshooting
